DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 16 August 2004 has been entered.

Drawings

2. The drawings were received on 16 August 2004. These drawings are acceptable.

Allowable Subject Matter

3. Claims 1-7 are allowed.

4. The following is an examiner's statement of reasons for allowance: Claims 1-7 claim an apparatus and method for storing a last frame number taken for a corresponding image pickup theme in a frame number storage device, incrementing the last frame number for a currently set image pickup theme when an image is taken and storing the image data and the incremented last frame number in a recording medium in association with each other. While Kuba (US 5,806,072) teaches storing images corresponding to separate themes in separate folders and using separate counts for

each folder (e.g. Figures 53 and 60), Kuba does not disclose a method or apparatus wherein the frame number storage device retains the last frame number even if a new recording medium is inserted. Anderson (US 6,765,612) teaches maintaining a count of the last frame number taken in a non-volatile writeable memory in order to maintain the frame count (e.g. c. 5, ll. 28-66). However, the purpose of storing this number as disclosed by Anderson is to ensure that each image is uniquely identified in order to avoid naming conflicts when the images are transferred to the host computer. Therefore, the system of Anderson (i.e. maintaining a single counter for every image taken) and the system of Kuba (i.e. maintaining separate counters for each folder/theme) are considered to be incompatible with each other and even if they were combined, would not result in the claimed invention. Therefore, the prior art does not teach or fairly suggest a digital still camera or method of controlling a digital still camera as claimed in claims 1-7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
